

Integral Alliance Gains a new Member

2nd June 2015

We are pleased to announce that International Health Partners (IHP) has joined Integral Alliance, bringing the Integral membership total to 21 Members with their headquarters in 13 countries.

International Health Partners is based in the UK. Anthony Dunnett, IHP's President says: "We are honoured to join this exciting Alliance of charities seeking to bring a collaborative humanitarian response to natural disasters and conflicts. By working together we can achieve so much more than we could alone. Integral also enables IHP to be part of a holistic response, bringing our expertise in medicine alongside other Members providing, healthcare, shelter, sanitation and economic regeneration. Together we can provide health and hope to those most in need when calamity strikes."

Andrew Ryskamp, Chair of the Integral Board, says: "Now that IHP is a Member of Integral we are rounding out a dream to have a stronger medical component to our Alliance. We are blessed to benefit not only from the personal gifts Anthony and his staff bring, but also adding the Europe connection to our medically-based membership."

The Integral Board, made up of the CEO's and Presidents of Integral Member organisations, unanimously welcomed IHP into membership of Integral at its April 2015 Board meeting in Paris.

On Integral Collaboration:

- Integral’s goal is for all its Members to become more effective and efficient in their work and to see greater impact and reach as a result of working collaboratively.

Integral Members have a collaborative strategy for responding to disasters, with the **Integral Disaster Response Process** co-ordinating the emergency activities of its Members. The aim of the Integral DR process is to combine resources to ensure that as many people as possible are reached with the assistance they need. The Integral Secretariat plays a co-ordinating role to facilitate better communication between all Members in disaster situations with the aim of increasing support and avoiding duplication.
