

## The context

Torrential rains across Bangladesh, India and Nepal have destroyed tens of thousands of houses as well as schools and hospitals leaving millions of people displaced and in need of life-saving assistance.

**40 million**

People are affected across South Asia as a result of flooding and landslides caused by torrential monsoon rains.

## Bangladesh

**8 million**

- This is the fourth time communities have been affected by flooding this year
- Floods coincided with rice planting season

## India

**30 million**

- Floods have caused massive damage to agricultural land and livestock
- 12 400 schools have been affected

## Nepal

**1.7 million**

- Affected communities require shelter, water and sanitation and health support to prevent the spread of water-borne diseases
